

Sprint 1

Epic 1: Data Collection

User Story Description	Story Point
USN-1 Collect EV datasets from different public sources	2
USN-2 Load datasets into the project	1

Epic 2: Data Preparation

User Story Description	Story Point
USN-3 Clean missing and duplicate values	3
USN-4 Create required calculated fields for analysis	3
USN-5 Standardize and preprocess EV datasets	3

Total Story Points (Sprint 1)

2 + 1 + 3 + 3 + 3 = 12

Sprint 2

Epic 3: Data Visualization

User Story Description	Story Point
USN-6 Create charging station map visualization	2
USN-7 Create EV brand and model comparison charts	2
USN-8 Create price and range analysis charts	2
USN-9 Create interactive dashboards with filters	4

Epic 4: Dashboard Development

User Story Description	Story Point
USN-10 Develop the Tableau Dashboard with interactive visualizations	5

Epic 5: Story Development

User Story	Description	Story Point
USN-11	Develop the Tableau Story with guided insights and publish it on Tableau Public	5

Total Story Points (Sprint 2)

$$2 + 2 + 2 + 4 + 5 + 5 = 20$$

Total Story Points

Sprint Story Points

Sprint 1 12

Sprint 2 20

Total Story Points = 32

Velocity Calculation

Velocity = Total Story Points Completed ÷ Number of Sprints

$$= 32 \div 2$$

= 16 Story Points per Sprint

Planning Summary

Sprint 1 Deliverables

- EV datasets collected
- Data loaded into the project
- Data cleaned and preprocessed
- Missing values handled
- Dataset prepared for visualization

Sprint 2 Deliverables

- Interactive Tableau Dashboard
- Charging Station Map
- Price Analysis
- Range Analysis
- Brand Comparison
- Tableau Story
- Dashboard and Story published on Tableau Public
- Flask website integration
- GitHub repository and project documentation

This version follows the same structure and story-point logic shown in your planning document while being fully tailored to your EV visualization project.
